

**Schedule of Annual Fees for**  
**Certificates of Registration for Industrial Radiation Machines,**  
**Services and Lasers**

Each application for a certificate of registration shall be accompanied by a non-refundable fee equal to the appropriate annual fee.

Determine the annual fee by adding the base fee and the machine or service fee. The machine fee is determined by multiplying the appropriate machine fee by the total number of machines at a facility. A control which operates two or more tubes is considered to be a single machine.

In the case of a single certificate of registration that authorizes more than one category of use, the total fee is calculated using the category with the highest base fee plus the highest corresponding machine/service fee. This fee is determined by multiplying the highest machine fee by the total number of machines/services.
